

Defensive Barriers
MIL Units

HESCO.COM

HESCO.COM

The standard MIL™ unit is the original HESCO® Concertainer™ product and has become renowned the world over as the ultimate force-protection barrier system.

Attacks from terrorists, insurgents, and other adversaries are a constant reality to both military and civilian personnel, in dangerous spots around the globe. Defending against these ever-present threats demands protection that is secure, reliable, and readily available.

Whether used as a preventative barrier or to define boundaries, MIL units have been employed to safeguard personnel, vehicles, equipment, facilities and other critical assets in a variety of military, peacekeeping, humanitarian and civilian operations.

Once erected, MIL units can be filled using almost any locally available material, and the range of sizes is extensive, as shown on the right.

Hesco's unrivaled capability in design, technical innovation, manufacturing, training and customer support has made it a global leader in the design and manufacture of advanced force protection and a supplier to many nations.

Combining our technical expertise and knowledge of military and security engineering, Hesco constantly develops the Concertainer concept, and MIL units are now also available in recoverable format.

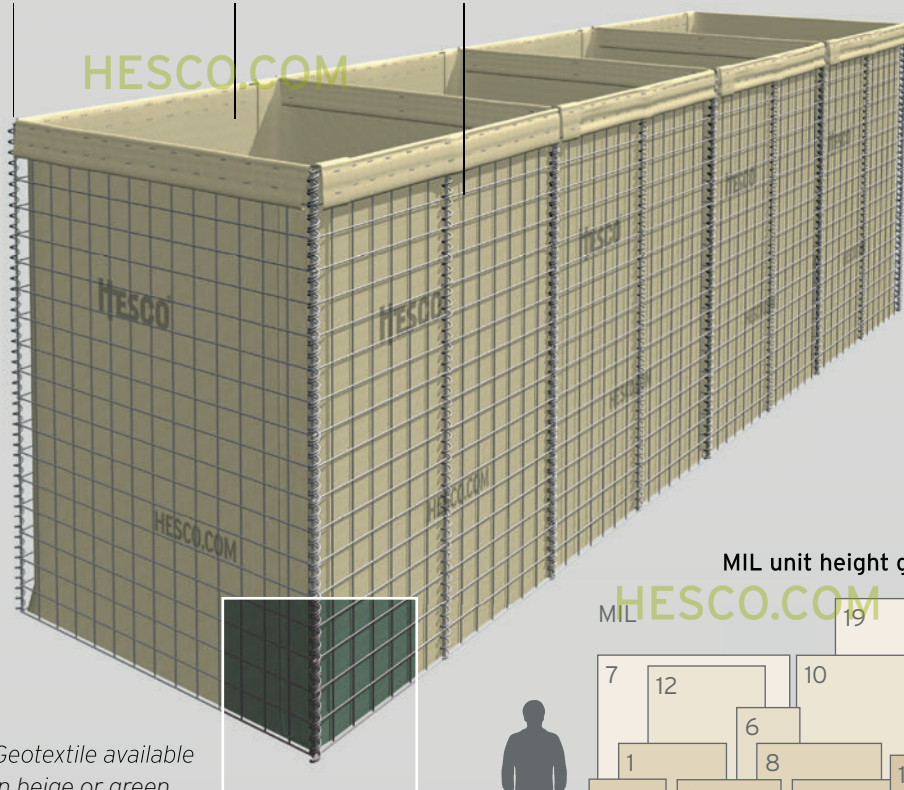

For more information about Hesco's products and MIL units, contact us direct or visit our website at: www.hesco.com

The product featured in this publication comes with a 2 year warranty, subject to Hesco's terms and conditions.

Spiral-hinged corners

Non-woven geotextile liner

Welded mesh frame

MIL unit height guide

Defensive Barriers

Product	Height	Width	Length
<i>Standard</i>			
MIL1 5442*	54" (1.37m)	42" (1.06m)	32'9" (10m)
